Introduction

Read and follow the prompts to find the **Secret** to successful data entry skills; and complete all eight steps in this section.

Lessons Menu

1. Click the **Lessons Menu** icon. If the *Please enter your Access Code* window appears, type your code in the Access Code text boxes and click **Validate**. If you don't have an access code, click the **Close** button in the dialog box, which will give you access to the first two lessons.
2. On the left side of the screen are links to each one of the lessons. You can access Lessons 1 through 24 with the Lessons Menu icon after you are entered your access code in the *Please enter your Access Code* window. In the example below, Lesson 1 is selected.
3. Type the first number highlighted in blue then press ENTER. Repeat this process and continue typing until the timer stops. If you have a textbook, see page B-4.
4. The timer begins when the first key is pressed. If you "mess up" and want to begin the lesson again, click the **Time Remaining** button at the bottom of your screen.
5. **You must complete each lesson THREE TIMES before moving on to the next lesson.** If you have less than 95% accuracy, the lesson will not be saved. While you are keying, a red box will appear around an error. If you have more than one red box, you'll need to do the timing again.

You may use the Backspace Key to correct an incorrect keystroke before you press the Enter key. Once the number is entered with the Enter key, you cannot change the number.
